

Tommy Raymond grew up in Houston Texas, and ultimately in Pearland Texas. Tommy began his career at Stewart and Stevenson Inc in Houston Texas. His family grew up with the company with his father and brother employees of the company for many years. He worked his way to an equipment draftsman and a designer and embarked in a career in mechanical engineering. Later became a specialized equipment sales engineer executing contracts worldwide for specialized oilfield equipment. He later became the director of all manufacturing for the company and held executive positions responsible for many product lines for the company. Later Tommy moved on to Wood Group operating as a Chief Executive Office for a Wood Group Company and subsequently held many executive positions with various companies. Finally Tommy and some partners founded their own company with Tommy holding majority shares and operated as the Chief Executive Officer and President of FTG Inc. The company was operating as an engineering and manufacturing company for specialized diesel and gas turbine equipment. The company diversified and began providing worldwide logistics to transfer specialized gas turbine power plants and related equipment. FTG operates today with a successful period spanning 10 years. Tommy is skilled in executive management in engineering and manufacturing and specialized in turn-key logistics. Tommy specializes in financial management of operating entities.
