Hilltop Lakes, TX

October 12, 2025

My official name is James Anthony Hatcher. Everyone calls me Tony.

My wife Cheryl and I moved to Hilltop Lakes in March of 2024 from Andrews, TX. Both of us are retired. Cheryl retired as a Registered Nurse, and I retired from the oil & gas business. We enjoy the serenity of this country living, occasional rain showers, and the green of grass and trees. It has been a pleasure to meet the neighbors and share conversations about grandkids, pets, and the weather.

I retired from Energy Transfer after 46 years in the Oil & Gas Industry. My last position was Sr. Director. My primary duty for the last 17 years was in Management focusing on Budgeting, Costs, set up maintenance frequencies for compression and pipeline systems. I have experience in managing multiple projects associated with OPEX or CAPEX and the required reporting to communicate dollar variances and timelines. I have experience with writing Scopes of Work to obtain bids from multiple contractors to receive best pricing.

The simpler version is I like to look at numbers, develop organized systems for maintenance frequency, and teach others to do the same.

I have a B.S. in Inter-Disciplinary Studies from the University of Houston, Downton. Cheryl has a B.S. in Biology and graduated from the University of Houston.

I am seeking a position on the Hilltop Lakes Board to help this community in any capacity needed to enrich our quality of life here. My philosophy is to keep things simple, welcome diversity, pull the wagon as a team member, listen and hear others, give back, step up and volunteer to help, and communicate results.

I look forward to serving this community, working with the existing HTL Board, and getting to know others in this community.

Best regards,

Tony Hatcher
