

Property Owners Association of Hilltop Lakes, Inc.

Hilltop Lakes Maintenance Department

Standard Culvert Installation

Amended and Restated

A standard culvert installation will be provided by the Hilltop Lakes Maintenance Department (HTLMD) for unimproved property (lot) to allow access to the property by the property owner. The following is a description of the material, labor and equipment used to install the culvert to a Hilltop Lakes Property Owner (HTLPO).

Material, labor, and equipment will be provided by HTLMD. The first pipe will be installed at no cost to the property to access that property. Additional pipe and required material to install additional pipe will be installed at the owner's expense. The following is included in the first pipe installed:

1. The pipe material will be 18" X 20' HDPE high density polyethylene pipe.
2. The culvert will be installed extending the (ENDS) a minimum length of ONE FOOT on each side of the slope.
3. The installation will be performed using HTLMD's backhoe or comparable excavating equipment.
4. The slope of the installation will typically run between two – six%.
5. The bed of the installation will consist of rock-free soil compacted at a minimum of four inches.
6. The fill around the pipe will consist of rock-free soil compacted at a minimum of six inches around the pipe.
7. The top or cover over the culvert will consist of rock-free soil compacted at a minimum of one foot above the pipe.

Not provided by HTLMD:

1. Any alternate material or changes to the specifications from that listed above. Requests to install using material and specifications other than stated above will be evaluated and if deemed feasible, will be done at the actual cost of the HTLPO, to include pipe material, rock material, other cover material and labor.
2. Labor cost will be based on how many staff hours required to complete the job and current employment rates (fully loaded) for those hours. Payment in full, based on an estimate provided in advance of work, will be required before the work will be scheduled. If actual costs exceed the estimate, property owner will be billed for the difference after the work is complete. Payment is due within 30 days of the invoice.

This service is intended to assist property owners in gaining access to unimproved lots. Improved lots and lots contiguous to improved lots and owned by the same property owner (those with waiver of maintenance fees) are NOT eligible for this service at no cost. Requests for culverts to be installed on improved lots and those contiguous to them can be made for a fee. The fee will be calculated and payment required similarly to that above for additional pipe.

This Policy is effective upon recordation in the Public Records of Leon County, and supersedes any policy on Culverts or Standard Culvert Installation which may have previously been in effect, except as affected by Section 209.005 and/or by this Policy, all other provisions contained in the Declarations, or any other dedicatory instruments of the Association shall remain in full force and effect.

Approved and adopted by the Board on this 7th day of June, 2021.
